IN PLAIN ENGLISH — WHAT SECTION 1 IS TELLING YOU

Your rating is fantastic, but your map pack rank relies heavily on consistent review velocity and high response rates to beat local competitors.

Why this matters: If 3 competitors get 5 reviews this week and you get 0, you drop in rank.

HOW TO READ THE SCORE ABOVE

The PULSE score is out of 100. It measures your practice's overall digital health. Every section from here on out has a box like this one to explain why it matters.

SECTION 2 IN PLAIN ENGLISH

Your basic intake forms work, but without an AI capture layer, you might still lose patients who abandon the form.

Why this matters: If 15 people a month try a broken form, they bounce. This is silently costing you booked exams every day.

SECTION 3 IN PLAIN ENGLISH

A mobile visitor stares at a loading screen for 4 seconds before your Call Now button is even tappable. This is long enough for roughly 1 in 5 patients to bounce back.

Why this matters: It is like your front desk making a patient stand there in silence for 4 seconds before acknowledging them.

SECTION 4 IN PLAIN ENGLISH

You are missing opportunities while you sleep. Most people are searching for help after hours, on weekends, or during lunch. When you don't respond, they move on.

Why this matters: A patient calls at 9pm on a Saturday, gets your voicemail, and immediately calls the next practice on Google.

SECTION 5 IN PLAIN ENGLISH

You can't retarget visitors properly. Without a Pixel, any money you spend on ads is wasted because you cannot track who showed interest.

Why this matters: Hundreds of people read your services page but didn't book. Without a Pixel, they are gone forever.

7 AI Overviews & Generative Engine Readiness

Is ChatGPT and Google AI citing you?

TOPICAL STRUCTURE Optimized Good silo architecture.	ANSWER-READY Strong Content is highly structured.
STRUCTURED DATA Found Schema.org tags configuration.	CITATION AUTHORITY High Trust High directory presence.
SECTION 6 IN PLAIN ENGLISH Inconsistent hours confuse Google Maps. If your website says one thing and Yelp says another, Google drops your ranking because it can't trust the data. Why this matters: If Maps says you open 8am Saturday, but your site footer says closed, Google penalizes this.	SECTION 7 IN PLAIN ENGLISH AI engines need direct answers, not fluff. ChatGPT and Perplexity are looking for structured Q&A formats, not generic brochure marketing copy. Why this matters: Saying 'We provide compassionate care' does not help an AI engine answer a user's question.

BRINGING PATIENTS

Solid reputation (129 reviews) and strong local presence. Basic tracking setup is in place.

LOSING PATIENTS

Intake forms lack modern AI qualification. Funnel relies on manual staff follow-up.
