

Tribeca Dental Care

128 Main St Suite 2, Somerville, NJ 08876
(212) 431-4582 | tribecanydentistoffice.com

ROBOINTECH

AI-Powered Practice Growth

63/100

PULSE

Tribeca Dental Care has excellent reputation fundamentals but is leaking customers on its own website due to a broken contact form and no 24/7 AI capture layer.

1 / mo

Too slow. Competitors are gaining.

RESPONSE RATE

12%

Unanswered reviews hurt conversion.

GBP PHOTOS

24

Good visual presence.

IN PLAIN ENGLISH — WHAT SECTION 1 IS TELLING YOU

When a patient searches “dentist near me”, Google shows a small map with only **three** practices above everything else. Most people pick from those three without scrolling. You sit at around **#4** — one place outside the box.

Your rating is not the problem. Google also measures how *active* a practice looks: how often new reviews arrive and whether the owner replies. One review a month, with 12% answered, reads as “quiet practice” to Google.

Example: 100 people search for a dentist near you this week. Roughly 60 choose from the top three and never scroll further. At #4 you are invisible to those 60 — even though your 4.8 rating beats two of the practices sitting above you.

What moves the needle: reply to every review, and ask two or three happy patients a week to leave one. That is the whole difference between #4 and the box.

MAP PACK

The three businesses in the map box at the top of local search.

REVIEW VELOCITY

New reviews per month. Google reads speed, not just the total.

Google Business Profile — the free listing behind your map result.

HOW TO READ THE SCORE ABOVE

Your 63/100 is the average of the seven areas checked in this report. Above 75 means an area is working and needs nothing from you. Between 50 and 75 means it is quietly costing you patients. Below 50 means it is losing you booked appointments today. **Every section from here on has a box like this one**, explaining the numbers above it in normal language — if you read nothing else in this report, read those.

SECTION 2 IN PLAIN ENGLISH

Your website is the receptionist that works nights and weekends. Right now the **Check Insurance** page loads an error instead of a form — so the most motivated patients, the ones asking whether you take their plan, hit a dead end.

Example: if 15 people a month try that form, that is 15 warm enquiries deleted before they ever reach your front desk. Nobody rings up to report a broken form; they just click the next practice.

SECTION 3 IN PLAIN ENGLISH

These scores are not about how the site looks. They measure how long a patient stares at a half-loaded page. The number that matters is the last one: **4.1 seconds** before the Book button can actually be tapped.

Example: it is your front desk making a patient stand there for four minutes while nobody looks up. Around half of mobile visitors give up after three seconds.

4 AI & Automation Maturity

Your 24/7 responsiveness and automated patient comms.

AI Chatbot / Live Chat

No chat widget detected. After-hours visitors bounce.

LSA SCREENED

Not Verified

Missing the top-of-SERP trust badge.

SECTION 4 IN PLAIN ENGLISH

This section is simply: what happens after 6pm and at weekends. **Missed-call text-back** means that when the phone rings while your team is chairside, the caller instantly receives a text — “Sorry we missed you at Tribeca Dental, reply here and we’ll get you booked.” Today they hear a ring tone and call someone else.

Example: cracked molar, Saturday 9pm. She lands on your site, finds no way to ask “can I be seen Monday?” and moves on to a practice whose chat box books her for 8am. She was never comparing dentists — only who replied.

SECTION 5 IN PLAIN ENGLISH

A **pixel** is a small piece of code that lets Facebook and Instagram recognise people who already visited your website, so you can show those exact people an ad later. It is free to install and takes minutes.

Example: 500 people read your implants page this month and left to think about it. With a pixel you can put a free-consult offer in front of those same 500 for the next three weeks. Without one they are forgotten, and you pay full price to find 500 strangers.

CITATION AUTHORITY

Thin

Directory gaps weaken trust signals.

SECTION 6 IN PLAIN ENGLISH

NAP means **Name, Address, Phone**. Search engines confirm a business is real by checking that the same details appear everywhere. Yours disagree — your homepage, your contact page and Google Maps each show different opening hours.

Example: Maps says you open 8am Saturday, the website says weekends closed. A patient drives over to a dark office. That is not one lost appointment — it is very often a one-star review, and it takes twenty happy patients to average one of those out.

This is the cheapest fix in the report: about twenty minutes, and no cost.

SECTION 7 IN PLAIN ENGLISH

A growing share of patients no longer search — they ask. “Best dentist in Somerville for implants?” goes into ChatGPT or Google’s AI answer, and one or two practices get named. Those tools quote pages that answer questions plainly and carry **schema**: hidden labels stating your address, hours and services in a form a machine can read.

Example: “We provide compassionate, state-of-the-art care” cannot be quoted — it answers nothing. “A single implant in Somerville typically costs \$3,000–\$4,500 over two visits” is exactly what gets quoted, with your name attached.

What This Means For Your Practice

BRINGING PATIENTS:

Elite reputation (284 reviews), clean tracking setup, and structured local SEO.

LOSING PATIENTS:

A broken insurance form, split booking systems, and slow mobile load times.

WHERE COMPETITORS PULL AHEAD:

No AI chat, no instant text-back, no unified real-time booking.

CLOSE THE AI GAP IN 30 DAYS

AI Calling

Never miss a call — instant text-back & AI voice receptionist.

AI-Ready Website

Fix broken form, add a 24/7 chatbot & qualified intake.

AI Appointments

One unified, real-time booking system, no more split tools.

AI Reputation

Turn Facebook into a real review channel, close response gap.

AI SEO / GEO

Structure content so AI Overviews & ChatGPT cite you first.

Book Free Strategy Call

THE FIVE WORDS IN THIS REPORT WORTH KNOWING

MAP PACK

The three practices Google shows in the map box, above all other results.

PIXEL

Free code that lets you re-advertise to people who already visited your site.

SCHEMA

Hidden labels telling Google and ChatGPT your hours, address and services.

PRM

Patient reminders and recalls sent automatically instead of by hand.

LSA

Google Screened — the verified badge shown above ordinary Google ads.

Not sure which of these matters most for your practice? That is what the free call above is for — we will show you the broken form live on screen, and you decide afterwards whether you want any of it fixed.
